Dolores Smith
School of Engineering Technology and Applied Science
Centennial College
941 Progress Avenue
Toronto, ON M1G 3T8

Dear Dolores Smith,

I am writing to express my sincere interest in pursuing a major in the Electrician Pre-Apprenticeship program at Centennial College. As a beginner in this field, I am eager to learn and contribute to the exciting world of electrical engineering.

Currently, I am studying Computer Programming and Analyst (T177) at George Brown College and am scheduled to graduate in June of 2024. My journey into the realm of engineering and technology began in high school, where I developed a keen interest.

In the summer of 2023, I gained practical experience as a construction worker in Texas. During this time, I encountered various electrical components and systems in the projects I worked on. From wiring installations to troubleshooting electrical issues, I acquired a foundational understanding of electricity and its practical applications in the construction industry. Additionally, I developed proficiency in using power tools essential for electrical work.

These experiences ignited my passion for understanding electricity and motivated me to pursue formal education in this field. I am eager to build upon my existing knowledge and skills by enrolling in your electricity program, where I can learn from experienced faculty members and engage in hands-on learning experiences. My background in construction work has equipped me with valuable skills such as attention to detail, problem-solving, and teamwork, which I believe will be beneficial as I embark on this academic journey.

Given my education and experience, I am confident that I am a suitable candidate for the Electrician Pre-Apprenticeship program at Centennial College. Upon thorough research, I am convinced that the coursework and program profile of Centennial College align well with my goals and aspirations.

Should you require any further information or have any questions, please do not hesitate to contact me using the information provided at the top of this letter. Thank you for considering my application. I look forward to the opportunity to contribute to and excel in your program.

Sincerely,

Minh Nhat Vo
